

California Dreamers (Beach Reading)

California Dreamers is the sixth book in Mark Abramson's Beach Reading series. All the books feature mystery and romance with a taste of adventure, a touch of magic and lots of San Francisciana. Tim Snow is recruited along with other HIV patients for an experiment with Neutrina, an AIDS drug with the peculiar side effects of enhancing dreams and expanding latent psychic abilities. The team enters a trance-like state ostensibly in order to predict and prevent suicides from the Golden Gate Bridge. But is something sinister going on with these trials? Warnings come from all directions, including from an elderly fortune teller named Malvina who has been plying her trade from a storefront in the Mission District for decades. And who is the mysterious young man who saves the life of Tim's employer? In California Dreamers, the entire cast of characters whom readers have come to adore from the Beach Reading series finds themselves involved with strange and criminal affairs.
