

Commonplace and Creativity (Odense University Studies from the Medieval Centre)

As the first book of its kind *Commonplace and Creativity* offers a comprehensive study of the formulaic narrative technique in the traditional ballads of England and Scotland. It outlines a new concept of the ballad formula and presents a new assessment of how formulas function in context. The author analyses more than 2.000 formula lines and stanzas, and emphasizing the distinctly dramatic, supra-narrative potential of the conventional ballad language he demonstrates that singers may use formulas discriminatingly to produce their own versions of the ballads. Formulas can be characterized in terms of both stability and variation, and consequently they are an important vehicle for the traditional re-creativity and gradual re-interpretation which are so vital for the life of the ballad tradition.
