

Desire and De-Description: Words and Images of Postmodernism in the late Poetry of William Carlos Williams. (A Case Study). (Amsterdam Monographs in American Studies 7)

This volume, without negating Williams strong ties with modernism, intends to dislodge this deeply ingrained critical positioning by presenting him as an overlooked figure in the emerging tradition of postmodernism. The study advances the claim that Williams clearly recognized this nascent discourse and, rather than pursuing his earlier mode of writing, consciously sought a new language for a rapidly changing cultural context. Drawing on wide-ranging, multidisciplinary critical texts, this book will be of interest not only to Williams scholars but to all those who continue to be intrigued by the elusive boundaries between word and image as well as modernism and postmodernism.
