

Human Rights and a New World Order: An Engineering Solution

Human rights, world peace, an end to discrimination, murder, torture and other atrocities is seemingly an elusive pursuit. Despite noble efforts, the United Nations, Amnesty International, World Watch and other human rights organizations have made little progress in the resolution of this worldwide disgrace. In this thought-provoking new book, Alavi has proposed a provocative formula that he believes could be implemented, with some modifications, under the existing United Nations Charter and would significantly impact human rights and world peace.
